DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group II, claims 5-8 and 13-15 in the reply filed on 4/27/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-4, 9-12, 16, and 17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/27/04.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5-8 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Cahill et al. (US Patent 6,083,585) or, in the alternative, Nelson et al. (US Patent 5,648,032) or, in the alternative, Shelby et al. (US Patent 5,980,797). Cahill et al. discloses forming preforms to be utilized for blow molding bottles, where the preforms are molded from polyester such as polyethylene terephthalate by an extruder maintained under an inert atmosphere such as a nitrogen blanket (column 15, lines 47-51). Nelson et al. discloses forming a bottle preform from polyethylene terephthalate which is molded in an extruder with a purge agent such as inert gas, nitrogen, which removes acetaldehyde from the polyethylene terephthalate (column 5, lines 1-3 and 54-46). Shelby et al. discloses a container formed from polyester mixed with an acetaldehyde stripping agent such as nitrogen or noble gases (column 5, lines 55-62) where the stripping agent may be present in the extruder (column 6, lines 50-53) as well as the mixer. Cahill et al., Nelson et al., and Shelby et al. therefore disclose the limitations of claims 3-5 and 13-15.
